

The image shows a technical drawing of a mechanical part, likely a bracket or base plate, consisting of a top view and a side view.

Top View: The top view is a rectangle with a central rectangular cutout. The cutout is positioned such that its left edge is aligned with the left edge of the main rectangle, and its right edge is aligned with the right edge of the main rectangle. The top and bottom edges of the cutout are parallel to the top and bottom edges of the main rectangle.

Side View: The side view shows the profile of the part. It features a vertical support on the left side, a horizontal base, and a vertical section on the right side. The top edge of the part is a straight line, and the bottom edge is also a straight line. The side view is drawn using thin lines, indicating it is a secondary or auxiliary view.

The drawing is rendered in black lines on a white background, with a clear distinction between the top and side views.
